Alex Morgan

Senior AI & Machine Learning Engineer | email: alex.morgan@example.com | (555) 019-2834

Professional Summary

Senior AI Engineer with 6+ years of production experience in Natural Language Processing, deep learning architectures, and scalable cloud deployment. Proven track record designing transformer models and low-latency inference pipelines.

Technical Skills

Python • Natural Language Processing (NLP) • PyTorch • Transformers • Scikit-Learn • FastAPI • Docker • Kubernetes • CI/CD • PostgreSQL

Professional Experience

Lead NLP Engineer — Cognitive AI Systems (2021 - Present)

- • Engineered multi-class NLP models to categorize customer sentiment using BERT and transformers, improving classification accuracy to 94%.
- • Architected low-latency REST APIs using FastAPI with Pydantic validation serving 5,000 QPS across distributed Kubernetes nodes.
- • Packaged backend services into Docker containers and managed cluster workloads with Kubernetes Helm charts.
- • Configured automated GitHub Actions workflows for testing, linting, and continuous deployment (CI/CD).

Machine Learning Engineer — DataSphere Analytics (2018 - 2021)

- • Developed and deployed a customer churn prediction pipeline using scikit-learn and Python that reduced churn by 12%.
- • Designed 3NF database schemas and optimized indexing in PostgreSQL to improve query times by 40%.

Projects

Clinical Entity Extraction Engine (PyTorch, Transformers, Spacy, Docker)

- • Fine-tuned RoBERTa models using PyTorch on AWS GPU clusters to extract biomedical entities from clinical trial documents.
- • Delivered 88% F1 score across 15 entity categories and deployed model as an autoscaled microservice.

Education

Master of Science in Computer Science, Georgia Institute of Technology (2018)

Bachelor of Science in Software Engineering, University of Washington (2016)
