# Jordan Lee

***Senior Backend & DevOps Engineer | email: jordan.lee@example.com | (555) 019-2834***

## Professional Summary

Backend Software Engineer with 5 years of experience building resilient microservices in Python and managing cloud infrastructure with Docker and Kubernetes. Strong database optimization skills in PostgreSQL.

## Technical Skills

Python • Django • FastAPI • Docker • Kubernetes • PostgreSQL • CI/CD • Git • Redis • Linux

## Professional Experience

**Backend Engineer** — CloudScale Platforms (2020 - Present)

- • Architected high-throughput REST APIs using Python and FastAPI handling 10M daily transactions.
- • Managed containerized application deployments using Docker and Kubernetes clusters across three availability zones.
- • Designed and maintained relational databases in PostgreSQL with complex partitioned queries.
- • Automated integration tests and deployment pipelines using GitHub Actions CI/CD.

## Projects

**Distributed Task Scheduler** (Python, Redis, Docker)

- • Built asynchronous task processing system capable of dispatching 50,000 background jobs per hour.

## Education

**Bachelor of Science in Computer Science**, Purdue University (2019)
